Professional Summary

Android Developer with 3+ years of experience building Native Android, Android TV, and Android POS applications using Kotlin, Java, Jetpack Compose, and modern Android architecture. Experienced in Offline-First systems, NFC payments, hardware integrations, Kotlin Multiplatform (KMP), and scalable transaction-based applications handling 1000+ daily transactions. Strong expertise in MVVM, Clean Architecture, Coroutines, Flow, Firebase, and performance optimization. Recently completed professional certifications in AI from IBM and Google, expanding expertise in AI-powered software development and modern application workflows.

Technical Skills

Languages: Kotlin, Java

Android: Jetpack Compose, Android SDK, Android TV, Navigation Component, Room, SQLite, WorkManager, DataStore

Architecture: MVVM, Clean Architecture, Repository Pattern, SOLID Principles, Modularization

Concurrency: Coroutines, Flow, StateFlow

Dependency Injection: Hilt, Dagger

Networking Backend: Retrofit, REST APIs, JSON, Firebase, Firebase Cloud Messaging

Integrations: NFC, POS Devices, Payment Systems, Google Maps API, Hardware Integrations

Cross Platform: Kotlin Multiplatform (KMP)

Tools: Android Studio, Git, GitHub, Postman, CI/CD

Practices: Agile, Scrum, Unit Testing, Code Review, Debugging, Performance Optimization

Professional Experience

Android Developer Jan 2023 – Present Technovia Info Solutions, Kerala

- Developed and maintained 10+ production Android applications across transportation, fintech, ticketing, parking, Android TV, and enterprise domains.
- Built Native Android, Android TV, and Android POS applications using Kotlin, Java, XML, and Jetpack Compose.
- Implemented Offline-First architectures using Room Database and WorkManager to ensure reliability in low-connectivity environments.
- Integrated NFC-based tap-and-pay functionality and closed-loop card systems for public transportation ticketing.
- Delivered applications supporting 1000+ daily transactions with high reliability and performance.
- Participated in Kotlin Multiplatform (KMP) migration initiatives enabling Android and iOS code sharing.
- Integrated REST APIs, Firebase services, POS hardware, payment modules, and third-party SDKs.
- Provided technical guidance and code reviews for a team of 2 developers, ensuring code quality and timely delivery.
- Improved application performance, maintainability, and stability through profiling, refactoring, and optimization.
- Received the **Promising Performer Award (2023)** for outstanding contribution and delivery impact.

Key Projects

OneDi Bus Ticketing – Android POS, Jetpack Compose, NFC-enabled Offline-First ticketing system supporting public transportation operations and high-volume daily transactions.

OneDi Pilot – Driver management application for transportation services, currently being migrated to Kotlin Multiplatform (KMP) for Android and iOS support.

OneDi App – Passenger transportation application for booking, trip management, and travel services.

OneDi Media – Android TV advertising platform for business promotions and digital content delivery.

OneDi PIS – Android TV Passenger Information System providing route schedules and arrival announcements.

OneDi AutoQ – Android TV application displaying autorickshaw schedules and queue management information.

OneDi Pay – Android POS payment processing application with hardware and payment integrations.

OneDi Pay Park – Android POS parking ticketing and payment management solution.

OneDi Prepaid Connect – Android POS application supporting prepaid card and transaction workflows.

Chandini Automobiles DSR – Enterprise sales, payment collection, and reporting application with offline support.

Domain Expertise

Transportation Systems • Android POS • FinTech • Android TV
NFC Payments • Ticketing Systems • Enterprise Mobility • Parking Solutions

Education

B.Sc. Computer Science 2019 – 2022 Kannur University, Kerala

Certifications

IBM AI Developer Professional Certificate Apr 2026
IBM

Google AI Essentials Apr 2026
Google

Flutter and Dart: Developing iOS, Android, and Mobile Apps Nov 2025
IBM

Python Full Stack Web Development Dec 2022
RISS Technologies

Achievements

- Promising Performer Award (2023).
- Led technical initiatives and mentored a team of 2 developers.
- Delivered Android applications supporting 1000+ daily transactions.
- Improved performance and stability of multiple production applications through optimization and refactoring.
